ORCID

*What is it?*

*Why is it necessary?*

*How to create an ID?*

*What information should you use?*
ORCID User Manual

What is it?
Emerging as a result of a collective started with the support of several publishers and partners, ORCID is a researcher identifying platform that allows to gather all research outputs in a single account using a unique digital identity.
Why is it necessary?

*It increases the possibility for researchers to be found, and their work to be accessed.*

It provides a secure network gateway enabling colleagues working in common fields to find each other’s work quickly and define another researcher as a potential collaborator.
I don’t have an account. What should I do?
Click ‘Register now’ and fill in the related fields to complete your registration.
You will be redirected to the homepage once your registration is completed. Your ORCID is ready now. You can update your other IDs (e.g. Web of Science ResearcherID, Scopus ID), country information, keywords or websites on this page.
Click ‘Add an employment’ and enter your organization information.
Important:
Select ‘Istanbul Kultur University’ in the ‘Employment’ section and type your department (in English) in the ‘Department’ field. Please do not use abbreviations and enter your date of employment and organization’s website in the related fields.
